Ali Abdulkhaliq

+9647512060951 | Erbil, Iraq | aliabdulkhalq6@gmail.com | linkedin | github | Portfolio: ali-software.dev

I am a skilled Back-End Software Engineer specializing in designing robust database schemas and developing high-performance APIs. I excel at leveraging the Laravel framework to build scalable, maintainable, and efficient web applications.

EDUCATION

Bachelor's in Software & Informatics Engineering **SEPTEMBER 2022 - JUNE 2026**
at Salahaddin University-Erbil
7th highest grade student

SKILLS

Backend: Laravel, Django REST Framework, ASP.NET Core, REST APIs
Languages: PHP, Python, JavaScript, C#, Java
Databases: PostgreSQL, MySQL, Redis
Backend Technologies: OAuth 2.0, Authentication & Authorization, Background Jobs/Queues, API Integrations
Dev Tools: Git, GitHub, Docker, Postman
Frontend: Next.js, React, Vue.js, Tailwind CSS

EXPERIENCE

Fastlink Telecom - Full-time Back-End Software Engineering Intern **JANUARY 2026 - MAY 2026**

- Worked as a Back-End Software Engineer, contributing to the development of an E-Commerce web application using Laravel. Designed and maintained database schemas, implemented API endpoints, and handled authentication, validation, and data management to support seamless communication between front-end and back-end systems. Collaborated with cross-functional team members in an Agile-like environment, applying clean coding practices, debugging complex issues, and helping build scalable and maintainable software solutions.

Majid Al Futtaim - Full-time *IT Intern* **AUGUST 2025 - SEPTEMBER 2025**

- Completed an internship program by JOBS.KRD and Kurdistan Foundation, where I learned providing IT support, resolving user issues, managing accounts, and troubleshooting hardware, software, and network issues. Gained practical experience in system administration and solid understanding of network infrastructure.

@ iQ Cars on Ditana (Redfox Pro) - *Software Development Intern* **FEBRUARY 2025 - MAY 2025**

- Built a system for Ditana to efficiently handle RFQs, evaluate costs, generate quotes, and track profits, and improving the quoting process. This system is now being used by Ditana and it saves a lot of time for them.

MAIN PROJECTS

YekMedia - SaaS

- Building YekMedia, a full-stack social media management SaaS that enables businesses to connect multiple accounts, create and schedule content, and automate cross-platform publishing. Developed with Next.js, React, Laravel, PostgreSQL, OAuth, and background queues.

Karify

- Developing Karify, a full-stack job alert platform featuring a Python worker that monitors Telegram channels, matches new listings against users' keywords, prevents duplicates, and sends email notifications, supported by a Next.js interface and PostgreSQL database.

Salahaddin University Appreciation & Acknowledgement Recognition Portal

- Developed the Laravel backend for an academic research management platform, implementing secure authentication, role-based access control, and RESTful APIs for managing researchers, publications, journals, and institutions.

CERTIFICATIONS & ONLINE COURSES

Pre-Internship Training Program (Organized By JOBS.KRD & Kurdistan Foundation)

The training covered CV and resume writing, job applications, interview prep, workplace ethics, personal branding, and the challenges interns may face—equipping me with essential skills to start my professional journey.

Meta Back-End Developer (Offered by Meta - Sponsored by Rwanga)

https://www.coursera.org/account/accomplishments/professional-cert/9V5L7PX2ZRAT

This 9-course program prepares learners for an entry-level career as a back-end developer.
